• XDS Extended Duration Shippers are proven to extend product integrity below –20° C (-4° F) for 7 to 10 days.
• Extended Duration Shippers provide up to 75% savings in product cost compared to polyurethane (PUR) or isocyanate containers.
• Extended Duration Shippers reduce the need for dry ice, up to 50% by weight.
• We offer three sizes of XDS Shippers to accommodate a variety of products.
• Included radiant barrier and outer box enhance performance.
• Insulated shipping container is manufactured with specialty polymer to enhance durability.
XDS Shippers are a HM polymer EPS 2" wall thermal shipper with a special interior radiant barrier and heavy duty outer corrugated designed for extended duration shipments.

Ambient temperature was $> 38$ degree C (100 degrees F)
